PREMIUM E-MAIL & CALENDAR MANAGEMENT THAT'S AFFORDABLE, EFFICIENT & IN THE CLOUD

Microsoft Exchange is the world's leading platform for unifying a business's email, calendar and contacts, more than 470 million mailboxes worldwide leverage Exchange to communicate, collaborate and compete in today's business environment

STILL USING POP3? POP3 IS DEAD, HOSTED EXCHANGE IS THE FUTURE!

In today's world, it's vital that we can access our e-mail from anywhere. It's vital that our e-mail sync's across our PC, Tablet and Mobile Phone. It's vital that i can share my calendar and contacts with my colleagues, improve time, efficiency and reliability.

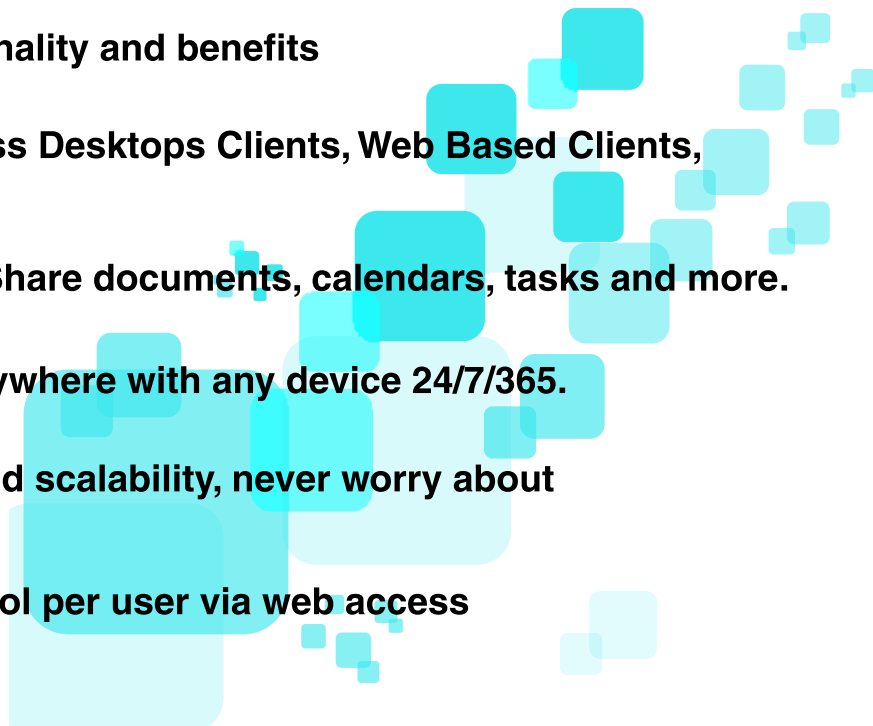

So what is "hosted"?

In the past, Microsoft Exchange was deployed on-premises. This meant you needed to buy a server, pay for licences and hire an IT person to install and maintain it. Now, with Hosted Exchange, your Exchange Server is installed and managed in the cloud, as a service, with no large overheads as before but with all the functionality of Exchange. You never have to worry about the server management, installations, up-time and reliability. We do it for you.

BENEFITS:

- 1 No capital outlay, no servers, no maintenance, access enterprise email at SME prices.**
- 2 Complete Exchange functionality and benefits**
- 3 Multiple E-Mail access across Desktops Clients, Web Based Clients, Tablets and Mobile Devices.**
- 4 Exchange isn't just E-Mail. Share documents, calendars, tasks and more.**
- 5 Access your E-Mail from anywhere with any device 24/7/365.**
- 6 Much improved reliability and scalability, never worry about upgrades or licences.**
- 7 Advanced Anti - Spam control per user via web access**

HOSTED EXCHANGE FEATURES:

If you are a small business that has never used Microsoft Exchange before, now you can have access to its powerful e-mail, shared calendars, and task management functions without the IT headaches and expense of owning your own servers. Manage and share your email, calendar and contacts with your existing Outlook client for PC or MAC, or the Microsoft Web Access Client on any web enabled device.

You get all this with no up-front capital investment and no need for expensive, hard to maintain remote connectivity technologies. Best of all, Flash Technologies Hosted Exchange is fully supported by Vox Telecom's top notch hosting platforms and support staff ensuring up-time reliability and all year around access and support.
