Flash Technologies – Improve the use of Technology today!

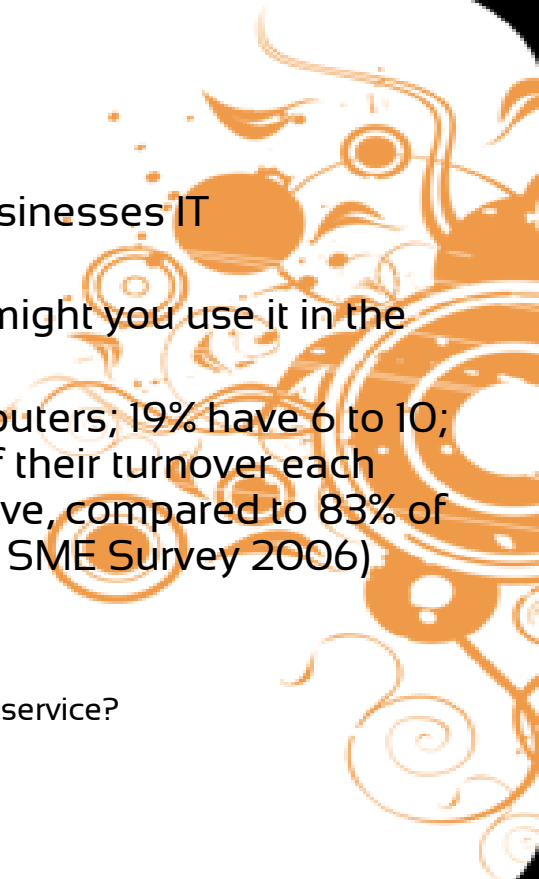

Attention: All SMME Owners, Please enjoy our proposal in getting your business to use Microsoft solutions to improve your office today!

IT ALL STARTS WITH A PLAN!

Technology is an unavoidable cost of doing business. Without it you could lose time, customers and your competitive edge.

- Ask yourselves these questions?

- How much effort have you ever made to understand your businesses IT requirements?
- How does your business currently use technology and how might you use it in the future?
- Did you know? 43% of SMEs in South Africa have 1 to 5 computers; 19% have 6 to 10; and 15% 11 to 20. Almost 60% of SMEs spend less than 1% of their turnover each year on IT! Of these only 74% regard themselves as competitive, compared to 83% of those who spend 3% to 5% of their turnover on IT. (Stats from SME Survey 2006)
- Before you decide, ask yourself the following:
 - What technology do my competitors use to outperform me?
 - What can I do to make it easier for my employees to provide better customer service?
 - Will it make my operation easier to run?
 - Will it enable more sales?
 - Do I need to improve my businesses technology?

Do you even know what a server is and what it can do for your business?

- Let's see where you are the moment?
 - Do you regard the data you have in your business as valuable?
 - Would the implications be a disaster if you lost all your business data and e-mail tomorrow?
 - Would you like to communicate electronically to all your staff?
 - Do you require access to your data remotely?
 - Would it benefit your business to make your data and e-mail secure and safe?
 - Do you want a stable and secure Network? Do you want your Network Printers and peripherals to actually work?
 - Wouldn't it be great to have an Internal Website that everyone could access and update?
 - When you accidentally delete important files, do you want them back?
 - After a PC Crash, do you want to plug in your new/repaired PC and carry on where you left off, with NO data or e-mail loss?
 - Did you answer YES for any of the above?

SERVER SOLUTIONS

Welcome to Microsoft Small Business Server 2008

An affordable Integrated solution

Windows Small Business Server 2008 is designed for small businesses. It is designed to work with existing technology, build on Microsoft best practices, and deliver a comprehensive network at an affordable price.

- Have virtually anytime, anywhere access to your business desktop, including e-mail, files, business applications, and more.
- Share resources and equipment, such as Internet access, printers, and fax machines, to get the most value from your technology investments.
- Enjoy compatibility and scalability. As your business needs change, Windows Small Business Server 2008 can change with you easily add users, servers, and applications, or expand into other Microsoft technologies.
- Work confidently with a top performing network based on Windows Server 2008 technologies.

SERVER SOLUTIONS

Protect your business data:

Windows Small Business Server 2008 helps protect your vital business information from loss, by backing up the data on your network and helping enable you to recover accidentally deleted files.

- Use Microsoft Exchange for centralized and safe e-mail.
- Use antivirus and anti-spam protection to help protect your information from malicious attacks, viruses, and spam.
- Keep your computers and servers current and your network healthy and up to date with the latest updates.
- Get better control over your business and business information with daily and weekly reports alerting you on the health and security of your technology. A single administrative console gives you or your IT consultant a daily view of PCs and servers and makes it easier to manage common IT tasks.
- Get an at-a-glance snapshot of the security and health of your PCs and servers from a 'green check' report.

Grow your business Capacity:

Windows Small Business Server 2008 gives you highly secure access to business contacts, calendars, e-mail, files, and other important desktop resources from any Internet-connected computer, virtually anywhere at any time, so you can be productive while you're away from the office or on the road.

- Improve your day-to-day efficiency by using a central repository for storing and sharing information.
- Connect with customers, vendors, and suppliers easily and professionally, with access to contacts, appointments, and files from any Internet-connected computer or a Windows Mobile-powered smartphone, so you can be responsive even when you are away from the office.
- Access your e-mail from anywhere in the world.
